OBJECTIVE

.NET Developer with 2+ years building production systems in e-invoicing, e-contract, and multi-tenant SaaS platforms — shipped integrations with 12+ POS / e-commerce platforms and architected multi-tenant message pipelines powering Zalo Notification Service at scale. Strong in Clean Architecture,DDD, CQRS, microservices, and AI-assisted development workflows. Seeking a Senior .NET / Backend role to scale distributed systems, drive architectural decisions, and mentor junior engineers.

WORK EXPERIENCE

.NET Developer - MAT BAO CORPORATION

June 2025 - Present

MatBao.E-Invoice - *Electronic invoicing platform integrated with the Vietnamese Tax Authority*

- Owned core invoice services handling thousands/day, ensuring full compliance with Decree 70/2025/NĐ-CP and reliable tax submission.
- Built integration microservices with leading POS / e-commerce platforms (Nhanh.vn, KiotViet, Pancake, Haravan, Pos365, Sapo, SelluSeller, VietFul, Abit, CukCuk, BigSeller, Shopee) for automatic invoice generation and synchronization.
- Re-architected the matbao.in payment interface (v3) with ERP integration to auto-push orders, enhancing UX, stability, and order accuracy.
- Participated in the design and implementation of invoice adjustment and replacement workflows for cases where issued invoices contained errors.

MatBao.E-Contract - *Electronic contract & digital signature platform*

- Integrated 4-step eKYC authentication into the customer onboarding flow for purchasing RSS digital signature packages.
- Built the contract creation module with customizable templates, configurable signers/signing order, and signature positioning
- Designed a dynamic data-replacement engine auto-filling customer / company / contract data into templates, eliminating manual contract drafting.
- Implemented the email-based signing flow with secure links, signature drawing, and automated signature placement.

ZNS Portal (eTelecom) - *Multi-tenant SaaS for Zalo Notification Service & OA management*

- Engineered a 5-queue RabbitMQ pipeline (send, campaign, schedule, retry, dead-letter) with Quartz.NET scheduler and exponential retry (30s → 2m → 5m).
- Integrated Zalo Cloud ZNS & OA APIs via OAuth2; built Wallet/Billing engine, OA Chat, analytics dashboard, Redis caching, and JWT-based RBAC.
- Built multi-tenant model with CompanyId partitioning, supporting Shared/Dedicated Zalo Apps.

○ **Well365 Platform** - Shop, Beauty & Spa modules in a microservices ecosystem

- Developed 3 core business modules on .NET 8 Web API applying Clean Architecture, DDD, SOLID, CQRS
- Integrated SQL Server, MongoDB, and Elasticsearch via Repository pattern; designed gRPC for inter-service comms and RabbitMQ for async messaging.
- Implemented Redis caching to reduce DB load and improve response time on hot endpoints; containerized with Docker.
- Wrote unit tests to ensure code quality; managed version control and code reviews using GitHub.

PROJECTS

LogFlow — Company-Wide Log Monitoring System

Mat Bao Corporation · Internal Tool · Built with Agentic AI Workflows · **1st Prize (5M VND)**

-
- Implemented API-key ingestion with rate limiting, an error-stack deduplication engine, a real-time Blazor dashboard, and threshold-based email alerts that turn passive logs into actionable incidents.

365Emart — Microservices E-commerce Platform

Final Year Project · An Giang University · January – May 2025 · Full Stack Developer · **GPA: 9.8**

-
- Built end-to-end e-commerce on .NET Web API 8 + Angular with Microservices, Clean Architecture, DDD, CQRS, JWT, Hangfire, API Gateway, and Docker

SKILL

- **Languages & Frameworks:** C#, ASP.NET Core / MVC / Web API, Blazor, SignalR, Angular, React, Next.js, TypeScript, JavaScript (ES6+), jQuery, HTML5/CSS3, Bootstrap, TailwindCSS, Vite.
- **Architecture & Pattern:** Microservices, Clean Architecture, DDD, SOLID, CQRS (MediatR), Repository, Unit of Work, Event-Driven Architecture, API Gateway pattern, Outbox pattern.
- **Data & Persistence:** SQL Server, PostgreSQL, MySQL, MongoDB, Elasticsearch, Redis, Entity Framework Core, Dapper, LINQ, database design & indexing, query optimization
- **Communication & Messaging:** REST, gRPC, GraphQL, WebSocket / SignalR, RabbitMQ (5-queue pipeline, DLQ, retry policies), OAuth2 / OpenID Connect, JWT, Webhooks.
- **DevOps & Background Jobs:** Docker, Docker Compose, Kubernetes (basics), CI/CD, Nginx, Load Balancing, Hangfire, Quartz.NET
- **Observability & Security:** Serilog, structured logging, Application Insights, JWT-based RBAC, OAuth2 flows, eKYC, digital signature (RSA / RSS), HTTPS / TLS, OWASP Top 10 awareness.
- **AI-Assisted Development & Tools:** Claude Code, GitHub Copilot, Cursor, MCP, prompt engineering, agentic workflows, Git / GitHub / GitLab, Postman, Swagger.

EDUCATION & CERTIFICATION

- B.Eng. Software Engineering — An Giang University · Vietnam National University HCM · 2021 – 2025
GPA: 3.88 / 4.00 · Valedictorian — Top Graduate of the Software Engineering Program
- Agentic Vibe Coding — NeuronsAI · March 2026
- VSTEP Level B2 — Overall Band 6.5 (April 2024)
